

Andros, new residential development at the sea

Андрос

Описание

New residential project to be build on Andros, in the sought after region of Palaiopolis, 200m from the sea, surrounded by wild mountains and green valleys. This subterranean super modern residence is set together with one more identical house on a land of 9.200m². The architecture is minimal, compact, offers clear lines and is perfectly adapted to the natural landscape of the island. It offers complete privacy. The total of 290 m² living area is set on 2 floors and will feature a spacious living and dining room with wide openings to the infinity pool and the wide terrace, kitchen, 3 bedrooms and 3 bathrooms plus a 4th bed- and bathroom in the independent guest house. The underground floor features smart examples of energy-efficient architecture like geothermal heating and passive design that keep the interior comfortable while completely eliminating the need for heating or cooling in the winter and summer months. The Green roofs are also part of this climate-proof construction fitted in the beauty of the Cycladic natural environment. The architects of this sublime project received an award at the 9th Biennale of Young Greek Architects in September 2018.
